New Executives Join Pragmatics

Pragmatics Company Picnic

From the CBDO

Richard Silver,
Chief Business
Development Officer

As we close Fiscal Year 2015, Pragmatics can report that we've had a very successful year and are poised for future growth. We have won several important recompetes, both task orders and IDIQ contracts, as well as awards on a number of new and exciting programs that enable us to expand our business base. These awards have come from both defense and civilian agencies, including the Defense Information Systems Agency,

Federal Aviation Administration, Federal Deposit Insurance Corporation, Office of the Comptroller of the Currency, U.S. Department of Health and Human Services, and U.S. Navy.

To continue our growth, Pragmatics is investing in expanding our Business Development organization. CEO Dr. Long Nguyen, COO Joe Brock, and I have brought an outstanding cadre of individuals to Pragmatics to assist in identifying and qualifying new opportunities, capturing those opportunities, and pricing our proposals. We will add several more individuals to focus on our new IDIQ contracts and will also expand our proposal operations.

I would like to highlight the newest members of our Business Development organization:

Mark Bennett is focused on building a portfolio of business in defense logistics IT. During the last five years, he has focused on client operations and business development activities to provide IT and logistics solutions to a variety of federal clients, including the Defense Logistics Agency and Federal Aviation Administration. Mark has more than 17 years of professional experience, including time in the Royal Air Force, the U.K. Ministry of Defense/Defense Logistics Agency, and serving as a Foreign Liaison Officer stationed in the U.S. He received his U.K. Project Management Practitioner certification (equivalent to PMP certification in the U.S.).

Anje Berger joined Pragmatics as Capture/Business Development Director with many years of capture and business development experience. She has an outstanding

record of success, winning many major programs across the federal civilian landscape. She brings extensive leadership skills in leading-edge, highly disruptive advanced data management/cybersecurity solutions that enable users to protect all types of data from being hacked on networks, in data centers, in clouds, and across all transmission modes.

James Nichols, Director of Health IT, leads the development of Pragmatics' health IT practices. For the past 13 years, he has been an IT professional with the Department of Veterans Affairs, in positions including system manager and CIO. He has led multiple enterprise-level projects focused on standardized technologies, configurations, support requirements, and processes to enable improved efficiencies, cost avoidance, and enhanced customer experiences.

Adrienne Ward, Business Development Manager, has more than 12 years of experience working with federal agencies, including the Departments of Defense, Justice, and Veterans Affairs. She specializes in Department of Defense acquisition, capture management, business development, training and instruction, and overall program and project management.

Firoza Zafar joined our pricing team as a Senior Pricing Analyst. She supports DISD and is assisting in setting up internal pricing processes and standards. Firoza has more than 10 years of professional experience focused on pricing, finance project controls, and contracts. She has provided pricing support for several large and small government contractors in the metro area. She has an MBA with a concentration in finance.

I'm pleased to have Mark, Anje, James, Adrienne, and Firoza on the BD team and look forward to their contributions as we move into a new fiscal year with opportunities for corporate growth and expansion. Please stop by and introduce yourself to them.

Remember, we all contribute to the growth of the company by doing outstanding work for our clients and identifying new opportunities. If you have an idea or hear about a potential opportunity, please let us know — your Business Development organization is ready to help you!

Pragmatics Holds Annual Tech Day

Pragmatics held its third annual Tech Day on August 28 at Reston headquarters. CEO Dr. Long Nguyen, COO Joe Brock, and Vice President of the Technology Solutions Group (TSG) Sean Cohan opened the event, which was attended by more than 40 managers and technical leaders from throughout the company.

Twelve speakers made presentations covering a wide range of topics in conjunction with the meeting theme, "What we do and where we're going":

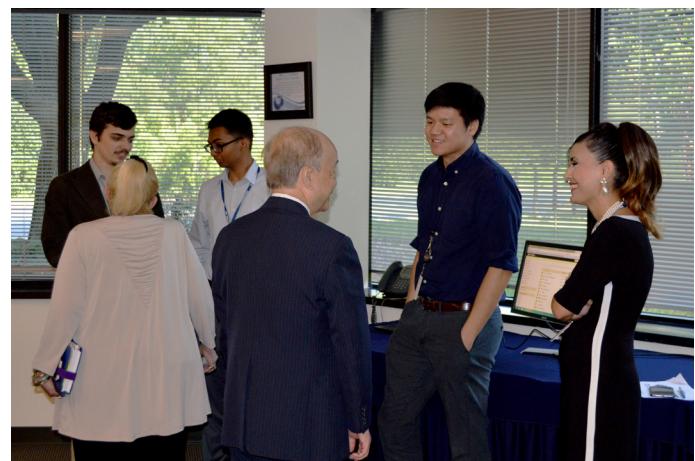

- ▶ Sean Cohan and Jared Spigner presented a redefinition of what TSG provides to Pragmatics divisions, programs, projects, and clients. This redefinition consists of three centers:
 1. The Solution Center — providing subject matter expertise on our core capabilities and technical solutions for our divisions and clients
 2. The Innovation Center — providing research and development, prototyping, productization, and training in the latest technologies that will be useful to our clients

3. The Support Center — providing pre-sales, capture, proposal support, customer engagement, white papers, tools support, intern training, etc.

- ▶ Honia Azizi, Javier Hilty, Andrew Huynh, Jim Ramia, and Zobair Shahadat — continuous delivery and DevOps
- ▶ Ben Greer and Michael Raskovskiy — cybersecurity and software assurance
- ▶ Niranjan Aenugu — user-centered design
- ▶ Charles Lawson — responsive Web design
- ▶ Mark Mathews — Enterprise Classroom Program

The event concluded with a social hour. Presenters were available for questions, demonstrations, and tours of the ECP Lab and Agile Software Development Center.

Tech Day is a highly anticipated event each year; attendees look forward to learning about Pragmatics' technological advances and how we use them to support our clients.

Pragmatics Appoints Dennis Lauer as Deputy Chief Operating Officer

On September 16, Pragmatics issued a press release announcing the appointment of Dennis Lauer as Deputy Chief Operating Officer (COO) and Vice President. Lauer reports to Pragmatics COO Joe Brock.

As Deputy COO, Lauer will work across all Pragmatics delivery areas to bring leadership and innovation. His extensive experience and insights into the federal government will be invaluable as Pragmatics continues its growth path into new opportunities.

Lauer joins Pragmatics with more than 30 years of experience in the federal government. This includes many years as a senior manager at the United States Agency for International Development (USAID) in increasingly responsible positions requiring organizational leadership and development. His final

role with USAID was Deputy Chief Information Officer (D/CIO), where he was responsible for strategic planning, enterprise systems architecture, budget and portfolio management, systems development, and infrastructure.

Following his time with USAID, Lauer was CIO and Chief Privacy Officer for Millennium Challenge Corporation and most recently was Vice President of Management and Administration and CIO for Overseas Private Investment Corporation.

Pragmatics COO Joe Brock said, "Dennis Lauer is a tremendous addition to the Pragmatics executive team. He brings a track record of great accomplishments throughout his career. Dennis will play a critical role in Pragmatics' achievement of our strategic objectives."

citybizlist, WashingtonExec, and Washington Technology featured this news.

Michael Froelich Joins Pragmatics as Vice President and Deputy General Manager, Federal Civilian Division

On September 17, Pragmatics issued a press release announcing that Michael Froelich has joined the company as Vice President and Deputy General Manager of the Federal Civilian (FEDCIV) Division. Froelich is responsible for supporting the oversight and direction of IT service delivery for clients including the Departments of Commerce, Homeland Security, State, and Treasury, as well as the Federal Aviation Administration.

Froelich is a proven leader, with a track record of helping clients transform their organizations using innovative technologies and business practices. He comes to Pragmatics from Acumen Solutions, Inc., where he held the position of Director and Business Unit Lead and was responsible for the creation and strong growth of the company's Midwest consulting practice.

He previously held management positions with Guident Technologies, Inc., SRA International, Inc., and BAE Systems, where he led business development initiatives and strategic planning efforts and provided technical advisory services for a number of civilian agencies and commercial clients.

Pragmatics COO Joe Brock said, "We are pleased to welcome Michael to Pragmatics. He brings nearly 20 years of experience in the IT professional services market to our team. Michael will use his expertise in client and project management to focus on business growth in the FEDCIV Division while optimizing the efficiency and effectiveness of the services Pragmatics delivers to our customers."

Pragmatics Named a Top Private Company by *Washington Business Journal*

Pragmatics issued a press release on September 18 announcing that it appears on *Washington Business Journal's* 2015 list of Private Companies. The list was published in the September 18 issue.

Pragmatics was ranked at number 61 out of the 100 companies listed. To qualify for the listing, firms in the Washington, D.C. metropolitan area submitted data including number of employees and corporate revenues. The final rankings were based on the revenues reported by the companies.

Pragmatics has appeared on *Washington Business Journal's* list of Private Companies each year since 2009.

Joe Brock, Pragmatics COO, said, "Pragmatics is pleased to once again rank among the top private companies in the Washington metropolitan area. Our inclusion on this list underscores our employees' commitment to excellence at every level. They are the reason for our success in delivering enhanced IT solutions to our government clients."

Pragmatics Named to CRN's 2015 Solution Provider 500 List

In June, Pragmatics issued a press release announcing it has been named to The Channel Company's 2015 CRN® Solution Provider 500 (SP500) list. The annual list spans eight categories, from hardware and software sales to managed IT services, and recognizes the top revenue-generating technology integrators, managed service providers, and IT consultants in North America.

Solution providers are ranked based on revenue, determined by product and services sales during 2014. Pragmatics placed at 138 on this year's list.

"We are honored to once again be named to this prestigious list," said Pragmatics COO Joe Brock. "Our inclusion reflects the success of our long-term strategy to meet and exceed the needs of our federal government clients. This has resulted in our world-class ability to integrate wireless and wired mobile distance learning on a national scale, particularly in the area of audiovisual and learning technologies for the Department of Defense."

Robert Faletta, CEO of The Channel Company, said, "The companies represented here are truly dedicated to the needs of customers today. With an evolving IT landscape, this prestigious list serves as a valuable industry resource to help vendors navigate the solution provider community and identify the best partners for their business. We congratulate the featured solution providers for their forward-thinking approach to solutions sales and look ahead to their continued success."

Pragmatics Annual Company Picnic

Pragmatics held its 2015 company picnic on September 19 at Bull Run Park in Centreville, Virginia. More than 150 employees, family members, and friends attended the annual event, first held in 1989.

In true Pragmatics picnic tradition, guests enjoyed good food, great company, games, a moon bounce, and face painting. The picnic is a wonderful opportunity for employees to spend time with coworkers in a casual setting.

Thanks go to everyone who helped to make the picnic a success, and special thanks go to Pragmatics CEO Dr. Long Nguyen for making the picnic possible.

In the Spotlight: Jameece Pinckney

I joined Pragmatics in May 2011 as Director of Contracts, with the challenging goal of building the Pragmatics Contracts Department. I was excited to join Pragmatics in 2011 and remain delighted and thrilled to be a part of the Pragmatics family today.

I am a contracts and legal professional, with a BS in Chemistry; Masters in Education, with emphasis in Administration; and Juris Doctor in Law. Since the start of my tenure at Pragmatics, reporting directly to the Chief Financial Officer (CFO), I have been responsible for establishing, implementing, overseeing, and managing all contracting and procurement activities, including contract and subcontract administration, purchasing, and integration-related matters supporting Pragmatics. I also provide direct contract administration for multiple contract types and manage contractual and legal actions corporately and within our regional offices.

I believe what makes coming to work so amazing is the awesome team of professionals working with me, and I share this spotlight with them. In 2011, I started with one contracts staff member, and our group now consists of three members: Amanda Carriger, Chris Giannotti, and Hiwot Tilahun. In 2013, I was given responsibility for standing up our

Procurement Department, where I currently have three staff members: Brian Johnson, Lydia Oribio, and Bradley Sigety. Also in 2013, I took over management of the project control team, which is now part of business operations.

Pragmatics Director of Contracts & Procurement Jameece Pinckney says of her team, “We are available, accessible, and will continue to deliver on our promise to serve.”

One of the first things I did when I joined the company was establish department goals for my team to build and establish relationships with business partners internally and externally. In addition, I believed setting goals would enable cohesiveness and encourage success within my team and in our support to other groups within Pragmatics.

We are a service-oriented and compliance organization — we are often referred to as Gatekeepers. Our portfolio of support is vast, from working with our proposal team and meeting the demands of proposal submissions to answering calls from the government when we are requested to perform quick task order closeouts.

I have greatly appreciated the executive support and support of the other leverage teams over the years; this has significantly contributed to our tenure and success within the company. We look forward to making more contributions to the company as we all continue to move Pragmatics forward.

Pragmatics Scholarship Awards

On August 3, Pragmatics awarded scholarships to eight college students through the Pragmatics Scholarship Program. The students, children of Pragmatics employees with five or more years of service with the company, were honored at an awards ceremony.

Pragmatics Founder and CEO Dr. Long Nguyen is a lifelong champion of education and believes it is the best way to add value to any enterprise. The Scholarship Program, established in 2001, is a testament to Dr. Nguyen's firm belief that as a company, we should support the next generation of leaders.

Awardees:

- ▶ **Caroline Alkire**, daughter of Linda Alkire, Marketing Communications Senior Manager. Caroline is a senior at James Madison University, majoring in media arts and design, with a concentration in journalism and double minor in technical writing and graphic design.
- ▶ **Ashley Chapman**, daughter of Darin Chapman, Senior NAS Operations Specialist. Ashley is a sophomore at George Mason University, majoring in communications, with a concentration in public relations and a minor in journalism.
- ▶ **Zachary Chapman**, son of Darin Chapman, Senior NAS Operations Specialist. Zachary is a junior at the University of Virginia, majoring in chemistry, with a specialization in biochemistry.

- ▶ **Lauren Gianni**, daughter of Kimberly Gianni, IV&V Subject Matter Expert. Lauren is in her third year of pharmacy school at West Virginia University.
- ▶ **Bridgette Glass**, daughter of Chris Glass, Director of Intelligence and Navy Programs. Bridgette is a senior at Johnson & Wales University, majoring in business administration.
- ▶ **Sarah Godfrey**, daughter of Todd Godfrey, PMP Configuration Manager. Sarah is a sophomore at the University of Mary Washington, majoring in history and American studies.
- ▶ **Rhiannon Kalbskopf**, daughter of Mark Kalbskopf, Senior Software Engineer. Rhiannon is a sophomore at Virginia Polytechnic Institute and State University, majoring in animal and poultry science.
- ▶ **Duy-An Nguyen**, son of Loan Nguyen, Lead Systems Engineer. Duy-An is a sophomore at George Mason University, majoring in accounting.

Congratulations to these eight outstanding students and future leaders as they continue their academic pursuits.

Apps, Sites, and Games. Oh My!

If you've been on social media sites, you've seen articles, quizzes, news, and sites your friends have shared. Certain articles, quizzes, apps, and games/sites have likely become repetitive on your newsfeed, and you might have wondered what all the fuss was about.

There are a few important questions you should ask yourself before you follow the herd. For example, how does this site, app, or game make money? Can it make money from anything I answer, upload, or say from the site? Do they really need permissions for the site, app, or game to function, or are these permissions just there to invade my privacy?

Websites, apps, and games can make money by selling ad space or selling you something directly. However, many free apps, games, and some sites sell information you provide to a third party, usually for market research. Free apps sometimes collect your location, device identity details, contact lists, and what you are searching. Some can even record your conversations, take videos, and collect your passcodes.

One website claimed it could tell you how old you look. Many people went to the site, agreed to the terms, and uploaded their pictures. The site then used its software to tell people how old they looked and asked if they wanted to share their photos with friends on social media. Countless people uploaded pictures of themselves, their friends, and their children, and someone finally read the terms of agreement. The terms stated that once an image was uploaded, the site had full legal right to "...copy, distribute, transmit, publicly display, publicly perform, reproduce, edit, translate, and reformat..." the image. The owner of the software and the app now has the right to use the uploaded photos on its website and in ads to sell its products, and the original owners of the images will not receive compensation.

How, then, do you protect your privacy in this highly digital age? If an app is connected through your phone or social media page, take a second look at the permission settings. If the permissions don't seem reasonable or needed for the app to function, don't download it or agree to the terms and conditions.

And before you give any information to a website, skim through the terms and agreement to see if they can take your information and sell it or if they will have full legal rights to the information or data you have provided.

Remember, not all companies are out to steal and sell your information, but you need to beware of companies that might be less than trustworthy to protect your privacy.

Pragmatics Hosts Recruiting Open House

On August 26, Pragmatics hosted a Pragmatics Tech Jobs Open House. More than 140 applicants attended. Pragmatics' HR team held the event to help fill positions for a new contract and other openings.

Pragmatics Toastmasters Club Celebrates Distinguished Club Status

The Pragmatics Toastmasters Club (PTC) celebrated its newly awarded distinguished club status on July 24 with a very successful Open House. Members shared their reasons for joining PTC in an impromptu speaking session — also known as Table Topics — led by Distinguished Toastmaster Lynn Wylde. This exercise not only provided guests with insight into the PTC, but also showcased the enormous speaking growth of its members.

PTC provides a supportive, relaxed, and positive learning environment where members are empowered to enhance communication skills by following a series of self-paced speaking assignments. Also, they hone leadership skills by volunteering for various support roles and serving as officers.

COO Joe Brock speaks at the Pragmatics chapter of Toastmasters International Open House.

In addition to speeches, members volunteer to participate in table topic discussions and perform monthly meeting support roles. Guests and potential new members are always welcome. You don't have to be a Pragmatics employee to participate (although it is a great way to meet your coworkers). Club membership now stands at 16, an increase of over 33% in the past year. This is due, in part, to the excitement generated by the members. To date, three members have earned Competent Communicator (CC) and Competent Leader (CL) awards. Consider joining us: you'll be developing your poise and public speaking skills among friends and colleagues. Interested in additional information? If so, contact Todd Godfrey, godfreyt@pragmatics.com, or Kyra Byron, byronk@pragmatics.com.

What's in Your Learning Plan?

By John O'Keeffe

Remember several years ago, when a common conversation starter was, "What's on your playlist?" Pragmatists were recently tasked with the completion of our corporate compliance refresher training in their SkillPort Learning Plans.

As we move through our careers, we learn about new technologies, obtain certifications, update our core capabilities, and focus on the future. There are many avenues to pursue in acquiring knowledge. As Pragmatics employees, you have options available through independent study, the content in the SkillPort Learning Management System, project-related training, leadership training, and tuition assistance.

All Pragmatics employees have access to SkillPort, which contains hundreds of courses, books, and videos on a wide variety of topics, with emphasis on business, desktop, and IT skills.

In the coming year, what knowledge challenge will you take on? What books do you plan on reading? What groups do you plan on joining? What new technologies will you need to know about? Ask your friends and coworkers, and start a conversation with, "What's in your learning plan?"

Remembering David Eldredge

CFO Kimmy Duong and David Eldredge celebrate at a reception held in honor of his retirement from Pragmatics in 2008.

Many longtime employees fondly remember David "Dave" Eldredge, who worked for Pragmatics from 1995 until his retirement in 2008. Eldredge passed away in May.

Prior to joining Pragmatics, he was a 25-year career employee at IBM, first as a software engineer, then as a program manager. Eldredge was Pragmatics CFO

Kimmy Duong's office mate and first boss when she joined IBM in the United States after arriving from Vietnam.

Duong said, "I knew Dave for more than 40 years, and he became a good friend. I am saddened by his passing, but I

Pragmatics Supports Special Operations Warrior Foundation

Mike Niezgoda (below, right), Director of COCOM Programs in Tampa, Florida, recently represented Pragmatics in making a donation to the Special Operations Warrior Foundation (SOWF), which supports the military's Special Operations Forces and their families.

Niezgoda said, "I had the pleasure of presenting Pragmatics' donation to Retired Vice Adm. Joe Maguire, President and CEO of SOWF and former Commander of the Naval Special Warfare Command. The admiral asked me to convey his gratitude to CEO Dr. Long Nguyen and the entire Pragmatics team.

"During my visit, I had the opportunity to learn more about SOWF and how it assists the children of Special Operators who died in the line of duty by providing funds to pay all expenses for college. SOWF is currently supporting 150 college students

smile when I think of him. He was a kind and generous person and was wonderful to work with. He also played an important part in Pragmatics' success."

Eldredge held numerous roles during his nearly 13 years at Pragmatics. They included using his expertise in structured project management on early software development projects that established Pragmatics' qualifications to bid on and win the JOPES contract in 1998. He also helped establish the company's corporate-wide configuration management and software quality assurance processes, which were instrumental in achieving CMM® and CMMI® status. Eldredge played a key role in setting up Pragmatics' first project management training program.

"I think one of Dave's greatest strengths was serving as an informal mentor to many new employees, helping them adjust to Pragmatics' way of life and software development practices," said former Vice Chairman Paul Cohen. He added, "For most of all, though, Dave was a great guy, devoted to and proud of his family and their accomplishments."

who are children of deceased Special Operations Forces service members."

Maguire (below, left) also noted Pragmatics' contribution to the Southeastern Guide Dogs Paws for Patriots Program, an organization that creates and nurtures partnerships between visually impaired or combat-weary veterans and guide dogs to provide assistance with mobility and independence. Paws for Patriots recently gave Maguire a retired working dog to use in espousing the program when he travels for SOWF.

Pragmatics is proud to continue our support to both of these organizations that do so much for our veterans and their families.

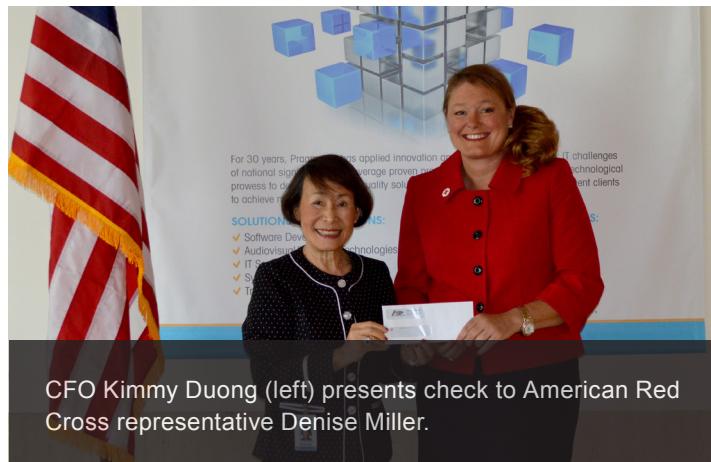

PragmaticSERVES Helps Those Affected by Nepal Earthquake

Pragmatics hosted a donation page through the Red Cross to help those affected by the April earthquakes in Nepal. The area near Kathmandu was hit by a 7.8-magnitude earthquake in April, followed by several large aftershocks and earthquakes in the following weeks. The earthquakes caused damage to infrastructures, affected communication, and resulted in many deaths.

With the help of Pragmatics' generous employees and a dollar-for-dollar match from CEO Dr. Long Nguyen, Pragmatics raised nearly \$7,500 to help with relief efforts. Thanks to everyone who donated for their concern, compassion, and desire to help those in need.

CFO Kimmy Duong (left) presents check to American Red Cross representative Denise Miller.

Pet Food Drive

Pragmatics held a pet food drive for the Loudoun County Humane Society. Employees donated cat and dog food and made monetary donations. The donations help keep the local pet food pantry stocked for families in need. The pet food pantry helps families feed their pets and keep them out of shelters.

Pragmatics makes Donation to the Fairfax Police Association

Pragmatics recently donated \$1,000 to the Fairfax Police Association. Representative Scott Tester accepted the donation from VP of Human Resources Michelle Geddes.

Accomplishments and Other News

Personal Achievement

Pragmatics' Frank Adams was ordained as a minister on August 14 at a ceremony at the Greater Saint Thomas Baptist Church in Philadelphia, Pennsylvania. Adams and his wife, Othed, are pictured at right following the ordination.

Memorial Day Parade

Pragmatics' Frank Peiffer and his wife, Lanette, were among those who donated the use of their antique automobiles for a Memorial Day parade in Quakerstown, Pennsylvania. The vehicles carried veterans (mostly from the Second World War and in their nineties) to Quakerstown Memorial Park for ceremonies held there. Peiffer, who works in Pragmatics' Trevose, Pennsylvania office, is pictured at left with his 1956 black-and-yellow DeSoto.

PM Graduation

On June 26, three Pragmatics employees graduated from the PM training class. Bret Luhman (left), and Garrett Delph (right) joined COO Joe Brock following the graduation. Bill Carden, not pictured, also graduated from the class.

New Employees

Pragmatics welcomes the following new employees who joined the company from May 1 - September 30:

STEPHANE ABELLARD	WILFREDO DEJESUS	AMANPREET KAUR	LOUIS SCHNECK
IBRAHEEM ABUKHDAIR	GARRETT DELPH	HASEEB KHAN	PAUL SCHNEGELBERGER
FAROOQ AHMED	CHARLES DIXON	DENNIS LAUER	ELIZABETH SEMYONOV
OMAR AKKAD	CAMERON EILERS	DIEP LE	ZORINA SIMEONOVA
SAIDAKHMAD ARISLANOV	ROBERT EMS	JOHN LINDSEY	DOUGLAS THRUSH
SANGEETHA ARIVARIGNAN	PATRICK FLIPPIN	HARRY MARTINEZ	HIWOT TILAHUN
MARCO ASEBEDO	JEANETTE FOX	JOHN MARTINEZ	JUSTIN TOENNIES
MICHAEL ATKINSON	MICHAEL FRIEDMANN	RACHEL MCCOY	JOHN TONG
HONIA AZIZI	MICHAEL FROELICH	MARIA MINJAREZ	TIMOTHY TOOHILL
SHARAD BARANWAL	ASHVARYA GARG	MARTI MORANO	ISRAEL TORRES
BRENNA BECHTOLD	CORBIN GERALD	KENNETH MOZIE	ALFRED TOSCANO
ANJE BERGER	RUBEN GONZALES	RAVINDER NADIPALLY	JASON TURNER
ROBERT BIXBY	NATHANIEL GUIEB	MUHAMMAD NASHAGH	HOMAYOON VALIAN
BRITTNEY BROWN	DINA HACHWI	CHRISTOPHER ODOM	MERVEN VAN PLEW
VICTORIA BROWN	DEREK HARASIM	CHIOMA OGBUOKIRI	MEGHAN VELTEN
JUDITH BURNS	DONALD HARRINGTON	DAVETTA OGUNLOLA	SERINA VOLORE
SHEREESHA BUSANELLI	TYRONE HAYES	DANIEL PARK	ADRIENNE WARD
MONICA CARBAJAL	EDWIN HEYMANN	ANIL PARTHASARATHY	OTHA WASHINGTON
BARBARA CASSANO	YOLANDA HOPEWELL	LE PHAM	DANIEL WATERS
DIVYA CHADDA	NINA HULL	CYNTHIA POE	DANTE WHITE-LURIE
UGANDHAR CHALASANI	BUSAYO IJAGBUJI	DAWEI QIAN	CATHERINE WILCOMB
PADMINI CHERUKURI	KISAN JADHAV	TARANG RAWAT	DERRICK WILLIAMS
CAMERON CHILTON	ANGELA JONES	JOEL RISSER	MARK WILLIAMS
SHARLEEN CHIRINDAH	NATHAN JONES	SHAWN ROGERS	ANDREW WILSON
JOSEPH CLARK	RICHARD JONES	NICHOLAS ROMANO	LING XU
WILLIAM COOK	GURVINDER KAHILON	CRAIG RUDOLPH	JIJIN YAN
MELANIE COOMBS	ROBERT KALLMEYER	MARK SALAMONE	FIROZA ZAFAR
